

## Cell Science

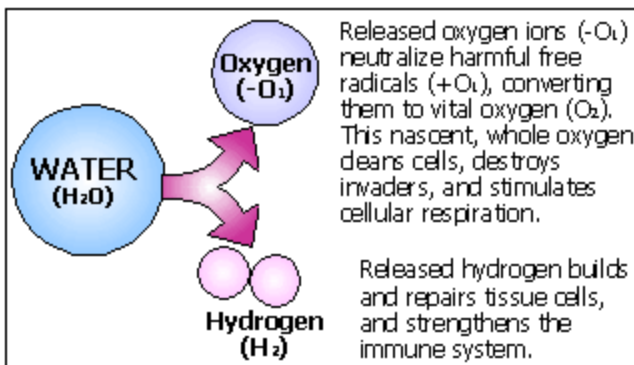

**CellPower** nourishes the body in a powerful way by providing abundant nascent oxygen, hydrogen, nano-nutrients, and electrolytes to the human body exactly where they are needed the most -at the deepest cellular level.

Metabolic Enzymes, Amino Acids, and Trace Minerals are the nano-nutrient particles that measure less than 0.007 microns in size.

**CellPower** uses nutritional nano-technology to nourish the cells of the body, overcoming many digestion and absorption problems.

The abundance of nascent (newly formed) whole oxygen molecules are used to clean up toxins and cellular debris, reducing stress on the liver, skin, kidneys, and lungs.

**CellPower** uses a high energy compound called deuterium sulfate to split water molecules throughout the body into nascent oxygen and hydrogen. This process continues for several days in a beneficial chain reaction that is controlled by the body, and occurs as needed.

"The doctors that I work with were just blown away by the powerful balancing effects of CellPower. Since I started taking it this winter, I was the only one in my family that did not get the flu. In the past I was always the first one to catch it."

- **Jon Wilcock**  
(health practitioner instructor)

"Several customers have been able to normalize their pH levels within 14 days by using CellPower. And their pH is still in the balanced range after months."

- **Rebecca Kuzelka**  
(owner of Earth is Enough, nutrition store)

"I believe that CellPower is a major factor in my improved prostate health. Since I started taking it, the inflammation is down and I'm feeling so much relief. I'm convinced it's because of CellPower."

- **D.M., Hemet, CA**

"I have had success in using CellPower to brush my teeth. It has killed much of the bacteria that I could not reach by flossing."

- **Denise Norbut, CNC**  
(owner of The Herb Cottage, health center)

# Speed Healing

Dr. Otto Warburg, a Nobel-prize winner, stated that "the primary cause of cancer is the replacement of normal oxygen respiration with anaerobic respiration." (A Lack of Cellular Oxygen!)

**Cellular Oxygenation and Detoxification may be useful for people who suffer from the following conditions:**

Allergies

pH imbalances

Emphysema

Indigestion

Chronic obstructive pulmonary disease

Kidney infections

Chronic fatigue syndrome

Skin disorders

Bronchial asthma

Arthritis and joint pain

Short-term memory loss

Fibromyalgia, muscle pain

Viral, fungal, and bacterial infections

**And much more...**

## CellPower's oxygenation and detoxification can improve your quality of life:

### Boost Immune System Response

- **CellPower** kills infectious bacteria and viruses, fungi, mold, and parasites. It has been shown to boost T-cell numbers and activity. It does not harm the beneficial flora and microorganisms needed by the body.

### Speed Healing Inside and Out

- **CellPower** is rapidly absorbed by the body through the mucous linings of the mouth, throat and esophagus.
- **CellPower** can be used topically when diluted 1 part **CellPower** to 10 parts distilled water. It has been used successfully for skin rashes, acne, sunburns, cold sores, minor cuts and bruises.\*

\*Please consult with a health professional.

### Increase Bio-availability of Vitamins, Herbs (Reduce Hunger)

- There is a natural and healthy hunger suppression that occurs when the brain senses the absorption of sufficient micro-nutrients (vitamins, minerals.)
- **CellPower** increases the bio-availability of nutrients from food and supplements. It may aid in weight management as less food and calories satisfy the body's needs.
- **CellPower** also increases the bio-availability of certain medicines. Check with your doctor to see if the doses of your medications can be gradually reduced as the body cleanses and strengthens.

### Normalize pH Levels

- An estimated 95% of the U.S. population is too acidic (less than pH 7.0) in their body's tissues and fluids. The ideal is to be slightly alkaline (pH 7.25).
- **CellPower** is effective in any pH range in the body. It tends to correct the body's acid-base balance and help maintain pH in the ideal range.

### Increase Cellular Respiration

- Pure oxygen is needed at the cellular level.
- Atmospheric oxygen has decreased from 38-50% saturation to 21% today in the air we breathe.
- **CellPower** brings pure oxygen to the cellular level.
- Speeds athletic recovery and helps remove lactic acid to boost performance.
